Release 1.0.1-beta

Diego T. Volpatto

Mar 28, 2020

CONTENTS

1	mypackage	1
1.1	blank-python-project package	1
1.1.1	Submodules	1
1.1.1.1	mypackage.foo	1
2	Indices and tables	3
	Python Module Index	5
	Index	7

MYPACKAGE

1.1 blank-python-project package

1.1.1 Submodules

1.1.1.1 mypackage.foo

A generic module to use as example.

`mypackage.foo.a_function(x, dim)`

Define a generic function.

Parameters

- **x** (*float*) – The function’s argument array.
- **dim** (*int*) – Number of dimensions to expand.

Returns The evaluated function at the given input array.

Return type float

INDICES AND TABLES

- `genindex`
- `modindex`
- `search`

PYTHON MODULE INDEX

m

`mypackage.foo`, [1](#)

INDEX

A

`a_function()` (*in module mypackage.foo*), 1

M

`mypackage.foo` (*module*), 1
